Inspection Published Comment:
MOBILE FOOD UNIT LICENSE IS APPROVED

Scope of Business: Facility is a mobile unit serving different types of bao buns, and rice bowls with chicken, BBQ pork and brisket. Unit has a licensed commissary kitchen where food is prepared prior to events.

Limitations: Extensive changes to the menu or remodeling of the unit require prior approval by the Regulatory Authority. The unit's current freshwater tank capacity is 16 gallons, and the wastewater tank capacity is 21 gallons. If future inspections determine that the 16-gallon freshwater tank does not provide an adequate supply of water for the unit's operations, a larger freshwater tank may be required to ensure sufficient water is available for handwashing, ware washing, and other operational needs.

Certified Food Protection Manager (CFPM): Employee is a certified food protection manager. Certificate was provided and is attached to the report.

Firm has been made aware of the basic food code requirements applicable to their establishment and current operation. Person in charge understands the responsibility of the permit holder to comply with those requirements. If subsequent on-site inspection reveals non-compliance with regulations, the permit holder agrees to bring violations into full compliance within the time frame specified in the Iowa Food Code.
